### EDUCATION

2021-2025

PES UNIVERSITY

- B.Tech in CSE with specialization in MIDS

2019-2021

ASC PU COLLEGE

- PU II: PCMC
- Marks: 510/600

### SKILLS

- Programming languages
  - Python, C
  - SQL, Neo4J
  - Figma, ROS, Matlab
- Cloud Computing in AWS and Azure
- Software Project Management and development
- Web tech and Database Management
- HCI and Robotics

### CERTIFICATES

- AWS educate badges
  - storage, networking, serverless and computing
- Problem Solving (intermediate) in HackerRank
- Software Project Management - Great Learning
- Infosys Springboard - Robotics

### PROFILE

Tech enthusiast with a passion for cloud and data analytics, excited to turn complex data into clear, actionable insights. Ready to use cloud computing to help teams work smarter and make a real impact in a digital-first world.

### PROJECTS

#### OptiML

AI consultancy app

- Developed an AI consultancy tool, "OptiML," designed to deliver real-time insights and tailored business recommendations. The app leverages financial, stock, and demand datasets to optimize strategic decision-making for FMCG and startup clients, reducing reliance on traditional consulting with affordable, actionable insights.

#### IWAS

Insurance Workflow Automation Software

- Built an insurance workflow automation tool using React, TypeScript, and Vite, focusing on a comprehensive SRS. Features include a Policy Manager for accounts, a Claims Router for efficient claims processing, and a Database Manager for streamlined data handling.

#### Shooting stats analysis

Stephen curry shooting stats

- Analyzed Stephen Curry's shooting performance using R, identifying trends in scoring consistency, efficiency relative to playtime, and performance under high-pressure situations. Insights covered team-specific performance and impacts of game context and defensive strategies.

#### Book recommendation app

Built with AWS PartyRock

- Built an AI-based book recommendation app with PartyRock that suggests titles based on author and genre inputs, with a chatbot feature for detailed book info. Enhances user experience by making book discovery more interactive and personalized.

### WORK EXPERIENCE

Kemsys Technologies

2023 JUNE-JULY

Assistant Research Intern

- Developed a prototype for an automated beverage dispenser featuring the Nedniryo 2 robotic hand. Created the user interface using a Nextion display and integrated the Niryo app for robotic hand control, along with additional components to complete the machine.
